

Backup and disaster recovery

Go beyond basic disaster recovery in a few clicks

Many businesses don't have in-house expertise or resources to set-up a comprehensive disaster recovery environments from scratch, making them prone to serious data loss, downtime, or compliance risks.

With Microsoft and Intel, you can go beyond basic disaster recovery and get everything needed for secure, private, and scalable disaster recovery — all pre-configured for seamless deployment and resilience and with a low, predictable pricing.

Choose the solution you need

Recovery Services Vault

Back-up VMs and replicate across regions
