Business application hosting

Quickly build and reliably run the back-end of your critical business applications

Many businesses often face downtime or slowness with aging in-house servers, escalating maintenance costs, and difficulty scaling their infrastructure as the company expands. They worry about data security and backups but may lack the IT staff to manage a secure environment.

With Microsoft Azure and Intel, get enterprise-grade security and power to run even your most resource-intensive applications seamlessly.

⚡ **A high-performance, dependable home for your applications**

Get smooth performance

Leverage Intel's best-in-class processors for smooth performance

Minimize downtime

Get hardware upkeep with redundancy management for a 99.9% uptime SLA

Prevent attacks and ensure compliance

Get built-in network security and monitoring and meet compliance needs

Choose the solution you need

Starter

Ideal for single application with moderate usage

- ✔ Azure VM (4 vCPU Intel® Xeon®, 16 GB RAM), running Windows or Linux
- ✔ 128 GB premium SSD storage
- ✔ 1 TB data transfer, nightly cloud backups
- ✔ Basic Azure support

$199/month

Standard

Comfortably host multi-tier applications or several workloads

- ✔ Azure VM (8 vCPU Intel® Xeon®, 32 GB RAM), running Windows or Linux
- ✔ 256 GB premium SSD storage
- ✔ 2 TB data transfer, nightly backups and geo-redundant recovery vault
- ✔ Standard Azure support

$349/month
