

# Web hosting

Build and personalize your blog, ecommerce, or personal website in just a few clicks, without a dedicated IT team

Many businesses struggle with slow or unreliable shared web hosting, limited IT resources, and concerns about security. They often face downtime, performance issues during traffic spikes, or high upfront costs to set up secure and scalable web infrastructure.

With Microsoft Azure and Intel, get a dedicated, enterprise-grade hosting for your website but on a small-business budget and effort.

Lightning-fast, secure, and scalable environment for your website

### Ensure fast load times

Leverage best-in-class Intel based VMs for fast load times and to handle traffic spikes

### Scale-up easily

Add CPU, memory, or additional instances with a few clicks, as your site grows

### Stop DDoS attacks

Benefit from the security and threat protection capabilities of the world's leading cloud platform

### Run the platform of choice

Linux/Apache or Windows/IIS web server

## Choose the solution you need

### Starter

\$99/month (est.)

Ideal for low-traffic or static websites

- Azure B2ms VM (2 vCPU Intel® Xeon®, 8 GB RAM)
- 50 GB SSD/Blob storage
- 1 TB bandwidth for data transfer/month
- Azure Free Tier support

### Standard

\$199/month (est.)

Suitable for growing sites or multiple web apps

- 1× Azure B4ms VM (4 vCPU Intel® Xeon®, 16 GB RAM)
- 100 GB SSD storage
- 2 TB bandwidth data transfer, nightly backup service
- Azure Standard support
